

**PCI-READY HOSTING & MANAGED SECURITY — DATASHEET**  
Designed for Compliance-Sensitive Websites

XMLA provides hosting environments architected to support PCI DSS compliance when paired with compliant payment gateways and practices.

**Security Architecture**

- Network segmentation
- Firewall enforcement
- Secure authentication
- TLS encryption
- Access logging

**Managed Security Services**

- Continuous monitoring
- Malware detection
- Patch management
- Incident response support

**What XMLA Does NOT Do**

- Store raw card data
- Replace PCI responsibility of merchants
- Certify compliance directly

**Ideal For**

- Ecommerce stores
- Subscription platforms
- Payment-enabled applications
